NEW Parker Hannifin Introduces a new Portable TireSaver™ Nitrogen Tire Inflation System

Haverhill, MA – Using dry nitrogen gas to inflate tires instead of compressed air will maintain proper inflation pressure preventing one of the major causes of tire failures. That's why many of the major tire manufacturers are now recommending the use of nitrogen for tire inflation. Nitrogen filled tires will last longer, provide increased safety, offer better fuel efficiency and reduced operating costs.

Parker Hannifin has recently added a new portable Nitrogen Tire Inflation System to its TireSaver product line for easy transport throughout your facility. This system will produce 95% pure nitrogen from standard compressed air. The TireSaver Model TS051-0ABCBR offers: a 30 gallon storage tank; built-in auto inflator that purges and fills up to 6 tires simultaneously; built-in counter to keep track of your nitrogen business; 2 pressure gauges included to monitor inlet and outlet pressure; a plastic bezel design to eliminate any potential for damage from accidental contact with vehicle, minimizing the weight of the unit for ease of portability.

A complete point of purchase kit is available with the purchase of each TireSaver Nitrogen Tire Inflation System. The kit includes: a countertop display, 200 valve caps, retail banner, 50 window decals, 5 buttons, poster, 200 save fuel cards, and 5 TPMS cap kit with roadside assistance.

With over 20,000 nitrogen generation systems installed worldwide the Parker TireSaver nitrogen generator has become the standard for tire filling.

For additional information, contact Parker Hannifin Corporation, Filtration and Separation Division, call toll-free at 1-800-343-4048 or 978-858-0505. Fax: 978-858-0625. Parker Hannifin Corporation, 242 Neck, P.O. Box 8223, Haverhill, MA 01835-0723.

With annual sales exceeding \$9 billion, Parker Hannifin is the world's leading diversified manufacturer of motion and control technologies and systems, providing precision-engineered solutions for a wide variety of commercial, mobile, industrial and aerospace markets. The company employs more than 57,000 people in 46 countries around the world. Parker has increased its annual dividends paid to shareholders for 50 consecutive years, among the top five longest-running dividend-increase records in the S&P 500 index.
